

SPEAKER RIDER & A/V PREFERENCES

3X EMMY AWARD WINNER. BEST-SELLING AUTHOR. KEYNOTE SPEAKER.

After three decades in live television, Anne Marie has seen every technical curve ball imaginable. These preferences simply help her deliver her best for your audience:

TOP PRIORITY CONFIDENCE MONITOR

Anne Marie customizes her keynote for each audience, so a confidence monitor that shows her **current and next slide** is a top priority to stay fully present and deliver seamlessly to your audience.

HER OWN COMPUTER

AMA's presentation uses custom fonts, layouts, and video, so she runs her session from her own MacBook Pro (HDMI output). She'll bring all adapters and be ready to plug in. If she is required to use in-house equipment, please inform us ahead of time so potential issues can be worked through.

MICROPHONE

Headset preferred, lavalier second. As the daughter of an Italian immigrant, AMA talks with her hands, so a hands-free mic is essential to how she connects with a room.

TECH CHECK

Please schedule a tech check 60 minutes before her session, or the night before if that works better for your team. It's a quick run through so the session starts clean.

NO SERVICE DURING THE SESSION

If the session falls during a meal, it's preferable to have food consumption finished and dishes cleared beforehand, to avoid noise or distraction.

CONTENT & RECORDING

Anne Marie retains all rights to her materials; they can not be reproduced or distributed without permission. Recording for distribution is available under advance licensing. Any slides or content from our team require approval before sharing with attendees.

BONUS RIDER

All we need is a stage, a microphone, and a room full of people ready to lean in. And if the schedule gets off track because a previous speaker runs long, don't worry. Agility is Anne Marie's superpower. Give her a heads up, and she'll adjust on the fly to help get your event right back on schedule.
